EDUCATION

California Polytechnic State University, *Electrical Engineering*, Expected Graduation May 2028

Boulder High School, Honors 4.2 GPA

EXPERIENCE

July 2025 – September 2025

Sales associate | University Bicycles | Boulder, CO

- Helped customers choose the right bike or rental by listening to their needs and offering clear, helpful advice based on experience and product knowledge.
- Performed routine mechanical checks on bikes before and after rentals, including brake adjustments, tire pressure, and gear tuning, ensuring safe and reliable performance.
- Worked closely with the team to track store inventory, restock popular items, and keep the floor organized, making it easier for everyone to help customers quickly and accurately.

July 2024 – August 2024

Production Associate | Infinite Commerce LLC | Broomfield, CO

- Operated labeling machines, filled bottles accurately, and heat-sealed packaging to ensure company product quality and consistency.
- Monitored and recorded production totals and inventory usage throughout each shift, helping maintain supply levels and streamline restocking and reporting.
- Collaborated with coworkers on a fast-paced assembly line, consistently exceeding daily production goals through efficient, accurate work.

April 2021 – August 2022

Mountain Bike Coach | Singletrack Mountain Bike Adventures (SMBA) | Boulder, CO

- Led daily rides and skill sessions for groups of up to 15 middle school campers in the mountains, prioritizing safety, coordination, and situational awareness in dynamic outdoor environments.
- Communicated clearly with campers, parents, and staff, practicing real-time decision-making and adapting plans to changing weather, trail conditions, or group needs.
- Developed strong interpersonal skills by interacting daily with campers and parents, handling questions, giving feedback, and ensuring everyone felt supported and informed.

PROJECTS

Arduino Light vs Sound Reaction Time Tester | Solo Project

- Coded an Arduino program in C++ to measure and compare reaction times to light and sound stimuli, utilizing hardware interrupts for precise timing.
- Designed and built the circuit on a breadboard, integrating an LED, buzzer, button, and LCD display to create a functional reaction time testing system.

4-bit Digital-to-Analog Converter (DAC) | 3 Person Lab Project

- Designed and simulated a 4-bit DAC using summing op-amps and R-2R resistor ladder in LTSpice; achieved 16 voltage steps from digital input
- Built and tested a 1" x 1" PCB in Autodesk Fusion 360 using SMD components; verified analog output using a binary counter and oscilloscope
